ABSTRACT

The present invention relates to a method for preventing exploiting an email message and a system thereof. The method comprising: decomposing the email message to its components; for each of the components, correcting the structural form (e.g. structure, format, and content) of the component to comply with common rules thereof whenever the structural form of the component deviates from the rules; and recomposing the email message from its components (in their recent state). The rules relate to email messages structure, for preventing malformed structure of email messages, for preventing exploiting an email message, etc. In case where the structural form of the component cannot be identified, the component may not be included within the recomposed email message, or included as is to the recomposed email message.
